

# Ready to Take Your Next Step?

Our growing and dynamic team is searching for an experienced

## Microsoft PowerBI Consultant

Great Britain

Do you have a passion for solving business problems through data analysis and the application of new and innovative technologies? Do you have drive, the ability to take ownership, work independently and communicate effectively?

Great, then we would like to hear from you!

Job Type: Full-time, Permanent

Salary: £40,000-£50,000 per year + pension + medical insurance (after 1 year) + bonus

### WHO WE ARE

We are a passionate and experienced team of BI consultants assisting companies primarily in the Retail and Finance/Insurance industry. Our expertise helps major companies to plan, develop and manage their BI solutions and derive value from their data to make informed business decisions.

We are a small but growing company working in close partnership with our larger parent company in Germany. Customer satisfaction and team culture are equally important to us, and especially in the current challenging times we are looking for team members who are interested, have drive, can work independently and have good communication skills.

### WHAT WE OFFER

The role offers the benefits of working for a dynamic start-up with an experienced team and excellent projects with well-known companies. You will be an integral part of our team and you will have a great opportunity to grow with it. The role will equip you with a broad range of skills across different industries and the opportunity to take ownership of entire projects. We will be open to your industry knowledge and your ideas.

## THE ROLE

Your responsibilities in the role will include the following:

- Examine companies' existing dataflows. Identify opportunities to streamline and improve.
- Design BI solution and technical landscape that meet business needs. Present the solution to the client.
- Develop and implement accurate and efficient BI and reporting endpoints that highlight risks and identify opportunities.
- Support business process optimisation efforts to improve data capture, data processing and data quality.
- Take ownership of issues and work closely with key stakeholders to resolve them.
- Gain additional insight from underlying data and share findings with key stakeholders.
- Evaluate new opportunities and technologies, assess feasibility and present findings as convincing business cases.
- Create documentation and provide end user training.

## ESSENTIAL SKILLS

- Strong technical background
- Certification or comparable experience (3y+) in MS Power BI
- Knowledge of or experience in data integration projects (ETL, APIs)
- Hands-on experience with cloud platform solutions, preferably MS Azure
- Understanding of database concepts (e.g. data lake, cloud technology)
- Understanding of all stages in a project lifecycle
- Familiarity with analytical methods, techniques and tools
- A true team player with integrity; a reliable go-getter with a strong work ethic
- Ability to work on new projects independently
- Drive and passion for analytics, data and problem solving
- Entrepreneurial and forward-thinking approach to strategic and tactical issues
- Strong stakeholder management, presentation and communication skills
- Natural interest in new technologies and ways of working
- Authorisation to work in the UK without need for visa sponsorship

## EMPLOYMENT BENEFITS

Competitive  
Remuneration

Flexible Working  
Arrangements

Coaching

Company  
Pension Scheme

Learning &  
Development
